Washington Quarters
Reverse Design Varieties (RDV)
From A to H, and Beyond

Presented by
José Miguel Gallego
Heartland Coin Club

California State Numismatic Association, CSNA
48th Annual Northern California Educational Symposium
Van Nuys, CA
April 23, 2016
(Rev. 2-12-2017)
Before we begin...

Thanks!

• I would like to thank Dr. James Wiles whose 2013 presentation, “Washington Quarter Reverse Design Varieties” sparked my interest in these quarters and for his support in the preparation of today’s presentation as well for answering ALL my questions.

• I will also like to thank is Herbert “Herb” Hicks, whose original article “The Washington Quarter Reverse: A Die-Variety Bonanza” published in February 1986 issue of The Numismatist first report the existence of these RDVs in Quarters. I want to thank him for his support, guidance and providing access to his collection of RDV quarters.

• To my friends, Ginny Bourke for inviting and encouraging me to do this presentation today and

• John Weiss creating the “All Washington Quarters Reverse Design Varieties Set” case display.

• Robert Paul for editing this document and suggesting a better layout design.

• And to my friends at the Heartland Coin Club for their support and encouragement (and patience!).

What you should have:

• A printed copy of this presentation and

• printed copy of the “Washington Quarters Reverse Design Varieties (RDV) Quick Reference Sheet” brochure. Very important: Updates are available at http://heartlandcoinclub.com/links.html#link14

Let’s quickly review this brochure since you will be using, hopefully extensively after today:

• It includes a photo for each RDV and initial pickup points or point of interests. (This presentation includes detailed pickup points and other confirmation points.)

• On the back, the table shows the RDVs with colored boxes showing the RDVs to look for.

• At the end of this presentation, a set of flowcharts is included which will guide in identifying the RDV by a series of questions.

THE BIGGEST TIP I CAN OFFER:

• Start collecting your own Reverse RDV Set with one of each of common varieties, why?
Objectives

- To learn the devices on the reverse of the Washington quarter.
- To learn about the Washington quarters reverse design varieties.
- To quickly identify each variety.
- To identify which varieties are common.
- To identify which varieties are rare.
- To learn about the three naming protocols.
- To encourage more coin collectors to collect Washington quarter RDVs.

Due to time constraints, it is not part of this presentation:
- How to grade them, they will be graded as a regular Quarter but must attributed as RDV and type.
- What they are worth, although an estimated value will be presented.
- History or theorize how the Mint decided to make this changes. Except that the consensus is that the US Mint decided to use used proof to complete the business production quarter since the regular dies were quite worn.
- Go into the details of the different dies used in the making of these varieties.
- We will very briefly look at the RDV-009 through RDV-014 (1973-1998) and RDV-015 and on (1999-2016).
Definitions:

Transitional Reverses: A transitional design variety by definition for the Wexler Die Variety Files is a working die on which the design for a given year was used the year before it was actually meant to be used, or on a working die during a year after it was removed from use. Subtle differences in design details can differentiate dies used in different years. Whether accidental or purposeful, obverse dies are sometimes mated with a reverse die meant for a previous or subsequent year.

Reverse Die Variety: Cover only changes on the reverse side of coinage series. Just about every contemporary coinage series have a variation of their reverse design. Sometimes the changes are so insignificant that people do not notice and in some cases, they are quite noticeable. Many reverse design varieties examples exist, in coinage such as Lincoln Cents, Washington Quarters and Kennedy Half series, just to mention a few.

Parts of a Coin

Obverse, or “heads” side of a 2000-D Statehood quarter. The obverse side, depicting the portrait or bust design, in this case, of President George Washington.

Reverse, or “tails” side, of a 2000-D Statehood quarter. This a good example of the design on reverse changes while obverse remains unchanged.

Edge: the very outer side of the coin. Because the edge can be treated in many ways, it is often referred as the coin’s third side.

Relief: the part of the coin’s design which is raised above the coin surface or field. Coins can be struck in many degrees of relief from low relief circulation coins all the way to ultra-high relief collector’s coins.

Weight and Fineness: The weight, metal content, and purity of a precious metal coin.
A Quick Look at the Reverse Devices on the Washington Quarter

1. The quality of the relief design in general and business vs. proof strike.
2. Spacing and serif location of the “E” and “S” in USA.
3. The quality of EPU.
4. Leg of “N” in EPU, short or long.
5. Serif on N in EPU.
6. M in EPU brackets with IB?
7. Feather on the back of the head of the Eagle.
8. Primary wing feathers, the quality, and shape.
9. Secondary wing feathers, the quality, and shape.
10. The shape of the wings tip.
11. Far left leaf next to the arrow tips, shape, and position.
12. Leaf next to the arrow tips, shape, and position.
13. Characteristics of the arrow tips.
14. Leaf below the arrowheads, shape, and position.
15. Arrow’s ribbon or barbed wire (as an X), is it complete?
16. The quality of the arrows feathers.
17. The quality of the tail feathers (rectrices).
18. Leaves below tail feathers, shape, and position.
20. General description of the Viewer’s right branch.
21. The condition of the “Q” in QUARTER, doubled?
22. “U” in Quarter touched by leaf above it?
23. Characteristics of the leaf above the “A” of DOLLAR.
24. The condition of Rim.

*Washington Quarters Reverse Design Varieties*
### Years to look for and Notes

**Reverse Die Variety**  
**RDV-001, Type A, I**

Issued from 1932 through 1964 as business strikes.

**All above common**

**NOTES:**

---

---
**Reverse Die Variety**

**Identifiers**

1. Proof-like reverse, the eagle has greater detail, high relief, and a slight coin rotation.
2. “ES” separated with “S” and “E” serifs leveled*.
3. EPU is of Proof quality of lettering.
4. Short leg “N” (notice the width of the slanted bar in “N”)
5. No serif on N*
6. “M” is bracket the “IB”*
7. Eagle has a feather on the back of the head.
8. High relief left primary wing feathers.
9. Medium secondary wing feathers, separation of feathers not well-defined.
10. **Sharp, pointed left wing tip**.
11. Far left leaf has a very sharp tip, below the leaf bud.
12. **Pointed (nipple) leaf above arrow tips, slightly leaned to the left and high relief**.
13. Arrow tips are rounded. The top arrow tips touching the leaf.
14. “Spoon” leaf behind and below arrowhead, almost touching arrow’s shaft.
15. Fully visible arrow’s ribbon (as an X).
16. Sharp arrow feathers.
17. Medium relief tail feathers.
18. Two leaves are touching the tail feathers, the third looks cut off.
19. Leaves on the left branch are well-defined; leaves on top of the left wing may have weak leaf tips.
20. Leaves on the right branch are well-defined; leaves on top of the right wing may have weak leaf tips.
21. “Q” in QUARTER is normal, no doubling.
22. “U” in Quarter is touched by the top leaf.

One additional pickup point is the branch on top of the “T” in QUARTER, is larger and runs parallel to the top of the “T”*.

</tr>
</tbody>
</table>
Issued from 1964-D-1967 as business strikes.

**All above common**

**Not common:** 1964-D, 1965 (Business Strike) and 1967 (Business Strike) are scarce to rare.

**Unconfirmed:** 1965 SMS, 1966, 1966 SMS and 1967 SMS.

**NOTES:**
The first clad version has EPU in thick low relief letters. However, due to silver blanks, it shows up strongly on 1964 DC.

</tr>
</tbody>
</table>
Issued from 1965-1969D as business strikes.

**Common for** 1966 thru 1968 business strikes.

**Not common:**
1969D is rare.

**NOTES:**
RDV-004 and 5 are very similar to each other and very common on the 1965 - 1967 issues and up to 1969 D. EPU appears thinner and in higher relief. The lower edge of the left wing has a very faint edge against the field. You might say it was feathered in.
Reverse Die Variety

**Identifiers**

1. Medium relief.
2. "S" serif is higher than the "E" serif.
3. **EPU is in higher relief and thinner**.
4. Short leg on the N.
5. **No serif on N of UNUM**.
6. M does not bracket with IB.
7. *Eagle has almost no feather on the back of the head*.
8. Medium strength of the left primary wings feathers.
9. **Medium strength of the left secondary wing. Inside feathers of the right secondary wings feathers are faint and some with an incuse outline on top and weak at the bottom**.
10. Right and left wing tips are well-defined, round, do not fade into the field.
11. *Far left leaf weak, pointed, narrowest, slightly below the leaf bud*.
12. Left leaf is rounder and closer to the arrowheads than RDV-004.
13. *Rounded arrow tips, the top arrow tip slightly smaller. Top two arrow tips quite far apart from the leaf*.
14. Pointed-leaf behind below and closer to arrowhead than RDV-004.
15. Fully visible arrow’s ribbon (as an X).
16. Sharp arrow feathers. A large gap between arrow feathers and on the back leaf.
17. Very sharp, strong and raised tail feathers and nicely separated with a round leaf.
18. *All three leaves have quite pointed tips, first and second barely touching the tail feathers, the third one is not touching them*.
19. All leaves on the left branch are well-defined with strong leaf tips.
20. All leaves on the right branch are well-defined with strong leaf tips. Leaf above right the branch is barely visible.
21. *“Q” in QUARTER is normal, no doubling*.
22. Leaf far from “U”.
23. The “A” of DOLLAR is not touched by the leaf.
24. Normal Business Strike Rim

Years to look for and Notes

Reverse Die Variety

Issued from 1968S thru 1970D strikes.

**Common for** 1968S proof strikes and for the 1969 and 1970D business strikes.

**Not common:** 1969D and 1970.

**NOTES:**
Most 1968 S and most 1970 D mint sets are type G. The type G also appears on a minority of the 1969 D and the 1970 Philly.

Type G was made from Type F artwork, Type F does not have Serif on N of UNUM.
### Identifiers

1. Proof-like reverse, the eagle has greater detail, high relief.
2. "S" serif is leveled with the "E" serif with a gap.
3. EPU is of Proof quality of lettering
4. Straight (long) leg on the N.
5. No Serif on N of UNUM.
6. "M" is bracket the "IB".
7. The feather on the back of the head is larger.
8. High relief feathers on both primary wings.
10. Both wing tips are sharply pointed.
11. Far left leaf has a very sharp tip, lengthen to be almost on the back leaf.
12. Pointed (nipple) leaf above arrow tips, slightly leaned to the left and high relief.
13. Top two arrow tips quite far apart from the leaf.
14. Large round leaf behind and below arrowhead that follows arrow’s head profile almost touching arrow’s head and shaft.
15. Fully visible arrow’s ribbon (as an X).
16. Well-defined arrow feathers, feather tips are blurry and almost touched by leaf.
17. Very sharp, strong and raised tail feathers, with centerlines in relief.
18. Two leaves are touching the tail feathers, the third looks cut off.
19. All leaves on the left branch have great detail and high relief.
20. All leaves on the right branch have great detail and high relief.
21. Leaf above the right branch stem is well-defined with strong leaf tips.
22. “Q” in QUARTER is normal, no doubling.
23. “U” in Quarter is touched by the top leaf.
24. The leaf on top of the “A” of DOLLAR is above and in front of it.

One additional pickup point is the branch on top of the “T” in QUARTER, is larger and runs parallel to the top of the “T”.

---

**Washington Quarters Reverse Design Varieties**

RDV-008, Type H, $III_b$
Years to look for and Notes | Reverse Die Variety | RDV-008, Type H, IIIb
---|---|---
Issued from 1968S thru 1972S strikes.

**Common for** 1968S thru 1972S proof strikes.

**Not common:** 1969-D, 1970-D, 1971-D, and 1972-D.

**NOTES:**
The 1969D can be found with high or low mintmark.

</tbody>
</table>

1. Slight to no serif on the "N" of ENUM, compared with RDV-012.
2. **N and I in UNITED merged on the top serifs** (and bottom on some) in proofs too.
3. **Left branch tip (viewer’s left) is longer** than RDV-012.
4. The distance between **R and I in AMERICA is narrower** than RDV-012 in proofs too.
5. Sharper arrow tip (this may due to die deterioration on RDV-012)
6. The top bar on T and E in UNITED are wider than RDV-0120.
7. The feather on the back of the head of the eagle is longer compared with RDV-012.
8. **Far left leaf, next to arrow tips, is smaller than RDV-011.**
9. I in AMERICA is thinner that in RDV-011
10. First claw in left talon and third claw in right talon are shorter than RDV-011 (this may due to die deterioration on RDV-012)
11. Leaf above the first L in DOLLAR is almost touching the L.
12. Leaf below arrowhead is close to the shaft and above arrowhead?
13. The bottom left inner wing is sharp?
14. The feather on the back of the head of the eagle is short compared with RDV-011.

(This article was published in the March 13, 2015 issue of the COIN DEALER CND MONTHLY SUPPLEMENT newsletter)

Based on trying to collect them from different sources:

- 1959 is by far the most common Type B quarter.
- 1960 and 1958 are next.
- 1957, 1963 and 1964 are pretty difficult.
- 1956, 1962, and 1961 are more difficult to get than any other. With 1956 being the hardest to find.

NGC and PCGS only started a couple years ago, (and with an additional fee) therefore the population of Type B is unknown. This is a GREAT opportunity to acquire certified but without the Type B certification.

# Summary

## Quick Pickup Points for Washington Quarter RDVs*

<table>
<thead>
<tr>
<th>RDV/Type</th>
<th>Class</th>
<th>Initial Identifiers</th>
<th>Years and Mints to look for</th>
</tr>
</thead>
</table>
| RDV-001  | A     | o In general, weak strike and low, “rounded” relief.  
|          |       | o No serif on N*.  
|          |       | o Far left leaf is quite weak with a rounded tip, quite below right leaf and bud to the left*.  
|          |       | o Very weak to missing leaf above the A of DOLLAR and not connected to A*. | 1932-1964 |
| RDV-002  | B     | o Sharp, pointed left wing tip*.  
|          |       | o Pointed (nipple) leaf above arrow tips, slightly leaned to the left and high relief*.  
|          |       | o “ES” separated with “S” and “E” serifs leveled*.  
|          |       | o No serif on N* | 1956-1964 |
| RDV-003  | C     | o Serif on N of UNUM*.  
|          |       | o Strengthened primary wings feathers. Stronger lower edge of the left wing*.  
|          |       | o Very sharp, strong and raised tail feathers, more "square and raised", and a very distinct centerline on each feather*.  
|          |       | o Sharp-leaf above the “A” of DOLLAR. Tip of the leaf is on the left side of the “A” and touching it* | 1964-D, 1965, 1967 |
| RDV-004  | D     | o No serif on N of UNUM*.  
|          |       | o EPU is in higher relief and thinner*.  
|          |       | o Medium strength of the left primary wings feathers. Weaker and some with an incuse outline on the inner feathers of the right primary wing.  
|          |       | o Far left leaf weak, pointed, widest, slightly below the leaf bud*.  
|          |       | o Pointed-leaf and below arrow tips.  
|          |       | o Very sharp-leaf behind, below and away from arrowhead*.  
|          |       | o Very sharp, strong and raised tail feathers, more "square and raised", and a very distinct centerline on each feather*. | 1969-D |
| RDV-005  | E     | o EPU is in higher relief and thinner*.  
|          |       | o No serif on N of UNUM*.  
|          |       | o Eagle has almost no feather on the back of the head*.  
|          |       | o Medium strength of the left secondary wing. Inside feathers of the right secondary wings feathers are faint and some with an incuse outline on top and weak at the bottom*.  
<p>|          |       | o Far left leaf weak, pointed, narrowest, slightly below the leaf bud*. | 1969-S Proof |</p>
<table>

<tr>
<th>Variety</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>RDV-006</td>
<td>IIIb</td>
</tr>
<tr>
<td></td>
<td>- Rounded arrow tips, the top arrow tip slightly smaller. Top two arrow tips quite far apart from the leaf*.</td>
</tr>
<tr>
<td></td>
<td>- Medium relief. Rather sharp relief*.</td>
</tr>
<tr>
<td></td>
<td>- EPU similar to Type C, IIIo, but a bit higher in relief*.</td>
</tr>
<tr>
<td></td>
<td>- Straight (long) leg on the N*.</td>
</tr>
<tr>
<td></td>
<td>- Serif on N of UNUM*.</td>
</tr>
<tr>
<td></td>
<td>- Far left leaf shorter than others, on the back leaf*.</td>
</tr>
<tr>
<td></td>
<td>- Left leaf with shows a clear vertical and tighter pointed tip and doubling*.</td>
</tr>
<tr>
<td></td>
<td>- Rounded arrow tips, same length. The top arrow tips closer to leaf*.</td>
</tr>
<tr>
<td></td>
<td>- Master doubling on lower leaves and Q of QUARTER most noticeable on the inside edge of the top of the Q*.</td>
</tr>
<tr>
<td>RDV-007</td>
<td>IIIm</td>
</tr>
<tr>
<td></td>
<td>- Rounded leaf, just below arrow tips, has a spoon-like shape with doubling*.</td>
</tr>
<tr>
<td></td>
<td>- No Serif on N of UNUM*.</td>
</tr>
<tr>
<td></td>
<td>- Master doubling on lower leaves and inside edge of the top of the Q of QUARTER*.</td>
</tr>
<tr>
<td></td>
<td>- Far left leaf is longer than other varieties, has been extended upwards and appears doubled, pointed and almost on the back leaf*.</td>
</tr>
<tr>
<td></td>
<td>- Rounded arrow tips, same length. The top arrow tips closer to leaf*.</td>
</tr>
<tr>
<td></td>
<td>- High relief of both primary wings feathers*.</td>
</tr>
<tr>
<td></td>
<td>- Very high relief of both secondary wings feathers. The bottom of the wings is very sharp and can be felt with fingernail*.</td>
</tr>
<tr>
<td></td>
<td>1969-D, 1970-P</td>
</tr>
<tr>
<td>RDV-008</td>
<td>IIb</td>
</tr>
<tr>

References

Washington Quarter Reverse Varieties:

Mismatched business/proof dies:

- 1999 $5 and $10 gold eagles struck with unfinished proof dies (W-mintmark), http://www.error-ref.com/mismatch-biz-proof-5-10-gold-eag/

Transitional Reverse (Minor temporal mismatches):

- 1939 proof Jefferson nickel obverse with 1938 reverse
- 1940 proof Jefferson nickel obverse with 1938 reverse

Sites and Forums of interest:

Washington Type B Forum – A site to talk just about Washington Quarters Type B. http://www.washingtontype-b.com/
ANACS – One of the two third party grading companies who use MADdieclashes and trail dies number system on their encapsulations.  
http://www.anacs.com/

Collectors Universe Forum – All sorts of coins are discussed in this forum.  http://forums.collectors.com/

CONECA – An organization dedicated to error and varieties.  http://hermes.csd.net/~coneca/

Coppercoins – Doubled dies and RPMs of the Lincoln cent series are listed here with colored images. Excellent reference material.  
http://www.coppercoins.com/

Error Coin Information Exchange – Error and variety coins are posted and discussed in this formatted exchange. 
http://groups.yahoo.com/group/errorcoininformationexchange/post

Error-ref.com – The go-to site for definitions of all error and variety coin. The site uses abundant colored images.  http://error-ref.com/

Franklin-Lover’s – An excellent site dedicated to Franklin errors and varieties  http://www.franklinlover.yolasite.com/

Independent Coin Graders – One of the two third party grading companies who use MADdieclashes and trail dies number system on their encapsulations.  
http://www.icgcoin.com/

Indian Cent – An excellent site dedicated to error and varieties on Flying Eagle and Indian cents.  http://indiancent.wikispaces.com/

MADdieclashes.com – An excellent site dedicated to die clashes from the United States and worldwide. Abundant colored images with denominational overlays are contained in this site. http://maddieclashes.com/index.html

Traildies.com – The only site dedicated to the anomalies called trails and wavy steps.  http://traildies.com/

VAM World – A great site dedicated to errors and varieties found on Morgan and Peace dollars.  http://www.vamworld.com/

Variety Vista – A master listing of all found doubled dies and RPMs. Dr. James Wiles, an authority on RDVs also lists newly found doubled dies and RPMs on this site.  http://varietyvista.com/index.htm
### Double Dies Variety of Type 2 Washington Quarters

In addition, being Type B (RDV-002) some of the Washington Quarter have also been found to be Double Die Obverse (DDO) and Double Die Reverse (DDR).

Below is a table that includes the DDRs (3) and DDOs (6) that so far have been reported.

*Updated 09/16/2016*
The photos that you see are from two different websites, CONECA.com and WashingtonType-B.com. In the next couple of days, Those that have their sources strikeout will replace with photos of the four double dies that I have. In addition, I will post a new Quick Reference Guide to Double Die Varieties of the Type B Washington Quarters.

### Washington Quarters Type B Reverse (RDV-002) Double Dies

<table>
<thead>
<tr>
<th>1957 Type-B Reverse, DDR-007</th>

(Updated: 11/14/2016)
The flowcharts in the following pages were created to help properly identify any of the Washington Quarter Reverse Die Varieties (RDV). It is a step-by-step process based on simple questions and observation. The flowcharts start assuming that you have selected it based on the date and mint mark of the Quarter.

To use them, select the appropriate flowchart for that corresponds to the year and mint of the Quarter that you would like to identify. For example, let’s assume that you have a 1964 Washington Quarter that you would like to find out what RVD it is.

First, go to page 28 and you will find that the first question is “Left wing has a sharp tip?”. Look at the reverse of the Quarter and look at the left wing of the eagle, on the flowcharts, that would be your right. Do you see a sharp wingtip or is it round like the one on the right (your left)?

It does not have a sharp wingtip, follow the NO arrow and will let you know that you have an RDV-001, Type A Quarter, a common one. You can go to page 8, to view the photo for an RDV-001, Type A; compare it by looking a the left wingtip a see if yours has the same rounded tip. If you find that it does not match and it has a sharp wingtip, go back to the flowchart and follow the YES arrow.

Assuming that your Quarter has the sharp wingtip, the next question you will be asked is ““ES” separated with “S” and “E” serifs leveled?” If you do not understand the question, you may want to go to the “A Quick Look at the Reverse Devices on the Washington Quarter”, page 7 and read about the different devices on the reverse if the Quarter, in this case, look at number 2. You could also look at page 9, RDV-002, Type B, Ila, and look the last two letters in STATES.

If the answer to the question ““ES” separated with “S” and “E” serifs leveled?” is yes, follow the YES arrow.

Continue answering the question by looking at the Quarter until you get to the “verify” box a the very bottom of the flowcharts. This box gives additional pickup points. If your coin passes them, you can almost be 100% certain that you have the coin that is what the “verify” box is indicating. To be 100% certain that it is, go to the page at the bottom for further verification and compare the Quarter with the photos on that page and read the additional pickup points.

A side note, there are other pickup points that you one can start when assessing (or attributing) Type B Quarters but I found that is easy to start by looking at the wingtip since it is easy to identify and you do not need a strong magnifier, saving you time. The flowchart goes from easy pickup points to harder to identify.
1956-1964 Washington Quarters
Selection Process

1956-1964 Washington Quarters

Left wing has a sharp tip?

Yes

"ES" separated with "S" and "E" serifs leveled?

Yes

Pointed leaf above arrow tips, slightly leaned to the left and high relief?

Yes

Quarter very likely is an RDV-002 Type B-1 Quarter
Scarce or Uncommon

Verify RDV-002 Type B-Quarter:
- Pointed (nipple) leaf above arrow tips, slightly leaned to the left and high relief.
- No serif on N.
- Branch above "T" of quarter is larger and run parallel to top of "T".
- "M" is bracket the "IB.
- Very strong and connected leaf above the A of DOLLAR.

Next, go to page 7 for further verification.

No

Quarter very likely is an RDV-002-1 (?) Type B-1 Quarter
Rare

Verify RDV-002-1 Type B-1 Quarter:
- Sharp top arrows tips Arrows tips away from the leaf, not touching the leaf.
- Pointed (nipple) leaf above arrow tips, slightly leaned to the left and high relief.
- No serif on N.
- Branch above "T" of quarter is larger and run parallel to top of "T".
- "M" is bracket the "IB.
- Very strong and connected leaf above the A of DOLLAR.

Next, go to page 7 for further verification.

No

Start again

Yes

Pointed leaf above arrow tips, slightly leaned to the left and high relief?

No

Top sharp arrows tips, arrows tips not touching the leaf?

Yes

Quarter very likely is an RDV-001 Type A Quarter
Most likely an RDV-001 Type A Quarter

Verify RDV-001 Type A Quarter:
- Pointed (nipple) leaf above arrow tips, slightly leaned to the left and high relief.
- No serif on N.
- Branch above "T" of quarter is larger and run parallel to top of "T".
- "M" is bracket the "IB.
- Very strong and connected leaf above the A of DOLLAR.

Next, go to page 6 for further verification.

Revisions:
Rev. 12-18-2016:

- Added temporary information about RDV-011 and RDV-012, these observations are not complete and entirely wrong. Hopefully, by next revision, we should have detailed pickup points and photos.
- Added the flowcharts that were on a different document.
- Added a description and an example on how to use the eleven flowcharts
- Added an initial table of contents, having problems with the space on the RDV headers
- Re-design layout
